HOW DO YOU HIRE AND RETAIN THE BEST PEOPLE FOR YOUR COMPANY?

Companies with engaged and motivated employees are 20% more productive and profitable than their competitors. MPA helps you to hire the right employees for the job.

ABOUT MPA

The Master Person Profile (MPP) is the cornerstone of the Master Person Analysis (MPA), supported by an opportunity to identify critical job Criteria. The MPA is suitable for use with employees at all levels across a range of applications:

+ Selection
+ Individual development
+ Leadership development
+ Outplacement
+ Talent management
+ Organisational development

The nine basic properties are subdivided into three main areas, each embracing three properties.

EGO DRIVE

A: Achievement Orientation
B: Self-assertion
C: Use of Energy

SOCIAL BEHAVIOUR

D: Emotional Control
E: Social Contact
F: Confidence/Trust

WORK STYLE

G: Attention to Detail
H: Security
I: Abstraction Orientation

TEST DESIGN

The MPP questionnaire consists of 160 items, arranged in question groups of four items each. Each question group tests four basic properties. It takes approximately 20-30 minutes to complete the test. The result is presented in a feedback report that presents the test taker’s person profile with the 9 basic properties.

The MPP questionnaire is quasi-ipsative. The quasi-ipsative format is used in occupational settings to make the test harder to fake. In addition, result distortion as an outcome of personal answering patterns is avoided.

TEST POLICY

Using MPA requires all test users to be certified by Master. MPA is a refined tool which requires the use of structured methods to draw valid conclusions. This is why all users must be certified prior to using the test.

Testing procedures should always adhere to Master’s best practice guidelines.

NORMS

There are country-specific norms for many countries. Please contact your local Master office to get the most updated information about current norms.

Norms for MPA are updated every 3 years and are representative for the country. Norms consists of test candidates from the working population ages 18 – 70 from varying branches and organisational levels and with different educational background.

In addition, MPA offers international and Asian norms.

REVIEWS AND CERTIFICATIONS

+ British Psychological Society’s Psychological Testing Centre (PTC) in 2017.

This certification applies to the English language version only and signifies that the MPA has been acknowledged with a quality stamp for meeting the industry standards for test quality - e.g. as defined by the British Psychological Society.

LANGUAGES

MPA is presently available in Bulgarian, Chinese Mandarin, Croatian, Czech, Danish, Dutch, English, Estonian, Finnish, French, German, Hungarian, Italian, Norwegian, Polish, Portuguese, Romanian, Russian, Slovak, Slovenian, Spanish and Swedish.
